

# Empowering underrepresented women in energy sector

Funded by  
the European Union

This project is funded by the European Union's Citizens, Equality, Rights and Values Programme (CERV-2022-GE).

The energy sector presents a significant gender disparity, with women being greatly underrepresented. The EUWES project seeks to identify the current obstacles hindering women's representation and to promote gender equality through the recommendation of inclusive policies and practices.

The project's primary goal is to empower women and foster opportunities for them to actively participate and contribute in decision-making processes within the energy sector. This includes energy sector companies, energy-related committees, research and higher education organizations, and energy-established study programs.

*EUWES addresses the underrepresentation of women in the energy sector by:*

Mapping and evaluating national gender policies.

Exchanging good practices and conducting training activities for women employed in the energy sector and female technical students.

Promoting advocacy campaigns and joint policy recommendations for tackling the gender gap.

The project brings together four organizations committed to transform the energy sector.

**#EUWES will:**

**Empower  
200 women  
and 400 female  
students**

**Create 4 national  
support groups**

**Promote policy  
solutions among 300  
key stakeholders**
